DETAILED ACTION

Note: This is in response to an Amendment filed 11/06/2006.

Claim Rejections - 35 USC § 102

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

2. Claims 1-22 are rejected under 35 U.S.C. 102(e) as being anticipated by Lim et al. (U.S. 6,946,173).

Lim et al discloses in figures 1-3, a catheter (10) having a balloon (24) mounted on its distal end; wherein the balloon (24) comprises a first plasma polymerized layer which form the outer layer (33) of the balloon and a second plasma polymerized layer which considered to form on the inner layer (34) of the balloon; wherein the first and second plasma polymerized layers (33,34) are formed by the reaction of monomer selected from the group as claimed (col. 2-13) and a stent (30) mounted on the balloon. As to claim the method claims 14-21, the Wang et al device is capable of performing the method steps as recited in the claimed invention.

Response to Arguments

3. Applicant's arguments filed 11/06/2006 have been fully considered but they are not persuasive. Applicant's arguments with respect to claims 1, 9, and 14 have been considered but are moot in view of the new ground(s) of rejection.
